## ICE PENDANT

Processes that involve extreme heat produce amazing and beautiful results and the mystery of transformation provides great inspiration to the designs at Cox London. Glass can be heated until it resembles liquid honey but with careful control it can be coaxed into wondrous pattern and formation. The cast glass bowl is simultaneously lunar and polar and gave inspiration to the bronze struts which were sculpted to resemble pancake rocks or columns of ice, the kind of which might lurk beneath the frozen surface.

760mm (30") OD x 1100mm (43.3") overall drop, including silver plated ceiling canopy and ess hook
